Immunology and Cell Biology (2003) **81**, 502–507

Subject index

2'-5' oligoadenylate synthetase
interferon type I and flavivirus resistance 224
3-dioxygenase
tryptophan and the immune response 247
4-1BB
immune responses in 4-1BB$^{-/-}$CD28$^{-/-}$ mice 176

A
acute lumphoblastic leukaemia
CD44 antibody recognizes malignant pre-B acute lymphoblastic leukaemia 311
adaptive immunity
cancer immunotherapy 106
adhesion
CD44 antibody recognizes malignant pre-B acute lymphoblastic leukaemia 311
leucocyte recruitment in systemic lupus erythematosus-prone mice 390
Aiolos
Ikaros proteins and malignancies 171
alum
epidermal powder immunization, hepatitis B surface antigen 52
alveolar macrophage
deficient phagocytosis in the airways in chronic obstructive pulmonary disease 289
animal models
molecular targets in rheumatoid arthritis 354
antibody
immunization using poly ε-caprolactone microparticles 185
antibody-secreting cells
optimisation of an ovine antibody-secreting cell culture assay 305
antigen dose
reducing antigen dose with cystosine guanine dinucleotide-containing oligodeoxynucleotide as adjuvant 59
antigen presentation
cytotoxic T lymphocyte responses to melanoma cell vaccines 459
interleukin-2 prolongs postactivational refractoriness 8
antigen presenting cells
aspects of cancer immunotherapy 79
antigen-specific B cell
isolation of antigen-specific B cells 163
antiviral signalling pathways
interferon type I and flavivirus resistance 224
apoptosis
deficient phagocytosis in the airways in chronic obstructive pulmonary disease 289
in vitro development of dendritic cells 144
apoptosis
T-cell apoptosis in *Mycobacterium avium* infection 480
autoimmune disease
drug treatment for rheumatoid arthritis and systemic lupus erythematosus 350
autoimmunity
Fcγ receptors and systemic lupus erythematosus 382
molecular targets in rheumatoid arthritis 354

B
B cells
why do B cells produce CD40 ligand? 328
bacteria
bacterial otitis media 46
B-cell lymphona-2
T-cell apoptosis in *Mycobacterium avium* infection 480
bronchial epithelial cell
deficient phagocytosis in the airways in chronic obstructive pulmonary disease 289

C
calcium signalling
signalling in mutant B lymphoma lines 297
cancer immunotherapy
cancer immunotherapy 106
CC chemokine receptor 1
CC chemokine receptor 1 mediating susceptibility to *Leishmania major* 114
CD28
immune responses in 4-1BB$^{-/-}$CD28$^{-/-}$ mice 176
CD4
requirements for interleukin-4 induction 283
CD40 ligand
why do B cells produce CD40 ligand? 328
CD44
CD44 antibody recognizes malignant pre-B acute lymphoblastic leukaemia 311
cell adhesion molecules
flavivirus decoys the immune response 207
cell culture
in vitro development of dendritic cells 144
cell cycle
interleukin-2 receptor signalling 343
cell development
murine dendritic cells development 239
cell isolation
isolation of antigen-specific B cells 163
cell polarization
X-linked thrombocytopenia macrophages show attenuated Wiskott-Aldrich syndrome phenotype 130
cell-mediated immunity
immunization using poly ε-caprolactone microparticles 185
cholesterol
cholesterol and intracellular trafficking 415
chronic granulomatous disease
differentiation and tumour necrosis factor-α in PLB chronic granulomatous disease cells 472
circadian
circadian macrophage inhibitory factor rhythm 137
corneal transplantation
antibody therapy for corneal transplantation 93
cortisol
circadian macrophage inhibitory factor rhythm 137
costimulation
cytotoxic T lymphocyte responses to melanoma cell vaccines 459

costimulation
immune responses in 4-1BB$^{-/-}$CD28$^{-/-}$ mice 176
CpG
epidermal powder immunization, hepatitis B surface antigen 52
CpG-containing oligodeoxynucleotide
reducing antigen dose with cystosine guanine dinucleotide-containing oligodeoxynucleotide as adjuvant 59
cytokine blockade
molecular targets in rheumatoid arthritis 354
cytokines
circadian macrophage inhibitory factor rhythm 137
MUC2 mRNA through mitogen-activated protein kinase pathway 275
cytotoxic T lymphocyte responses to melanoma cell vaccines 459
epidermal powder immunization, hepatitis B surface antigen 52
listeria species and interleukin-4 deactivation 431
cytotoxic T lymphocyte epitope determination
determination of cytotoxic T lymphocyte epitopes 1
cytotoxic T lymphocyte responses
cytotoxic T lymphocyte responses to melanoma cell vaccines 459
cytotoxic T lymphocyte
determination of cytotoxic T lymphocyte epitopes 1
Kunjin replicon ribonucleic acid as a vaccine 73
cytotoxic T-cells
reciprocal lysis of cytotoxic T-cells 266

D

delayed-type hypersensitivity
interleukin-4 suppresses induction of early delayed type hypersensitivity 424
dendritic cell maturation
lipopeptide-induced maturation of dendritic cells 67
dendritic cells
tryptophan and the immune response 247
aspects of cancer immunotherapy 79
immune response in hepatitis C virus infection 63
in vitro development of dendritic cells 144
lipopeptide-induced maturation of dendritic cells 67
murine dendritic cells development 239
differentiation
differentiation and tumour necrosis factor-α in PLB chronic granulomatous disease cells 472
diurnal
circadian macrophage inhibitory factor rhythm 137
DNA immunization
DNA-priming protein-boosting immunization 121
improving vaccines against tuberculosis 34

E

electron microscopy
plasma cells in rat yolk sac 335
ELISPOT
determination of cytotoxic T lymphocyte epitopes 1
encephalitis
flavivirus evasion of the immune system 196
Expanded Programme on Immunization
global immunization programmes 20
experimental autoimmune encephalomyelitis
interleukin-2 prolongs postactivational refractoriness 8
expression
mucosal vascular addressin cell adhesion molecule-1 outside the endothelial lineage 320

F

Fas
FasL
T-cell apoptosis in *Mycobacterium avium* infection 480
Fc receptors
FcγRIIa as an inflammatory mediator 374
Fcγ receptors
Fcγ receptors and systemic lupus erythematosus 382
FcγRIIA
FcγRIIA genotypes and streptococcus pneumoniae 192
fibroblast
mucosal vascular addressin cell adhesion molecule-1 outside the endothelial lineage 320
flavivirus resistance factor
interferon type I and flavivirus resistance 224
flavivirus
flavivirus decoys the immune response 207
major histocompatibility complex class 1 up-regulation by flaviviruses 217
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
flow cytometry
deficient phagocytosis in the airways in chronic obstructive pulmonary disease 289
isolation of antigen-specific B cells 163

G

genetic determinism
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
genotype
FcγRIIA genotypes and streptococcus pneumoniae 192
germinal centre
why do B cells produce CD40 ligand? 328
Global Alliance for Vaccines and Immunization
global immunization programmes 20
graft rejection
antibody therapy for corneal transplantation 93
grass pollen allergy
grass pollen immunotherapy vaccines 86
growth factors
fibroblast growth factor receptor interaction with Lck and nuclear factor of activated T cells 440

H

H-2K^{b}
aspects of cancer immunotherapy 79
haematopoiesis
in vitro development of dendritic cells 144
haemopoiesis
murine dendritic cells development 239
hay fever
grass pollen immunotherapy vaccines 86

Helios
Ikaros proteins and malignancies 171
hepatitis B surface antigen
epidermal powder immunization, hepatitis B surface antigen 52
hepatitis B
epidermal powder immunization, hepatitis B surface antigen 52
hepatitis C virus
immune response in hepatitis C virus infection 63
Kunjin replicon ribonucleic acid as a vaccine 73
lipopeptide-induced maturation of dendritic cells 67
HT29 cell
MUC2 mRNA through mitogen-activated protein kinase pathway 275
human papillomavirus
determination of cytotoxic T lymphocyte epitopes 1
hyaluronic acid
CD44 antibody recognizes malignant pre-B acute lymphoblastic leukaemia 311
hypoallergen
grass pollen immunotherapy vaccines 86

I

Ikaros
Ikaros proteins and malignancies 171
immune escape
major histocompatibility complex class 1 up-regulation by flaviviruses 217
immune evasion
cancer immunotherapy 106
immune regulation
requirements for interleukin-4 induction 283
immune response
flavivirus evasion of the immune system 196
immune response in hepatitis C virus infection 63
immunity
bacterial otitis media 46
immunization using poly ε-caprolactone microparticles 185
imunocontraception
evolution of immunocontraception resistance 152
immunoglobulin E
grass pollen immunotherapy vaccines 86
optimisation of an ovine antibody-secreting cell culture assay 305
immunohistochemistry
plasma cells in rat yolk sac 335
immunomagnetic separation
isolation of antigen-specific B cells 163
immunosuppression
antibody therapy for corneal transplantation 93
immunosurveillance
cancer immunotherapy 106
immunotherapy
grass pollen immunotherapy vaccines 86
indoleamine 2
tryptophan and the immune response 247
inflammation
bacterial otitis media 46
integrins and selectins in arthritis 397
innate immunity
cancer immunotherapy 106
listeria species and interleukin-4 deactivation 431
innate susceptibility
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
interferon type I
interferon type I and flavivirus resistance 224
interferons
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
cytotoxic T lymphocyte responses to melanoma cell vaccines 459
interferon-γ
immunization using poly ε-caprolactone microparticles 185
interleukin-16
requirements for interleukin-4 induction 283
interleukin-2 receptor
interleukin-2 receptor signalling 343
interleukin-4
interleukin-4 suppresses induction of early delayed type hypersensitivity 424
listeria species and interleukin-4 deactivation 431
requirements for interleukin-4 induction 283
intracellular trafficking
cholesterol and intracellular trafficking 415

K

Kunjin replicon
Kunjin replicon ribonucleic acid as a vaccine 73
kynurenine
tryptophan and the immune response 247

L

Langerhans cells
flavivirus decoys the immune response 207
Leishmania major
CC chemokine receptor 1 mediating susceptibility to *Leishmania major* 114
leucocyte
integrins and selectins in arthritis 397
lineage
murine dendritic cells development 239
lipopeptides
lipopeptide-induced maturation of dendritic cells 67
liposomes
cholesterol and intracellular trafficking 415
Listeria monocytogenes
listeria species and interleukin-4 deactivation 431
listeriolysin
listeria species and interleukin-4 deactivation 431
liver
immune response in hepatitis C virus infection 63
LS174T cell
MUC2 mRNA through mitogen-activated protein kinase pathway 275
lymphocyte activation
signalling in mutant B lymphoma lines 297
lymphocyte
integrins and selectins in arthritis 397

lymphoid malignancies
Ikaros proteins and malignancies 171
lymphoma
signalling in mutant B lymphoma lines 297

M
machrophage migration inhibitory factor
circadian macrophage inhibitory factor rhythm 137
macrophage deactivation
listeria species and interleukin-4 deactivation 431
macrophage
tryptophan and the immune response 247
X-linked thrombocytopenia macrophages show attenuated Wiskott-Aldrich syndrome phenotype 130
macrophages
innate mechanism in xenograft rejection 451
major histocompatibility complex class I
aspects of cancer immunotherapy 79
major histocompatibility complex class 1 up-regulation by flaviviruses 217
major histocompatibility complex
flavivirus decoys the immune response 207
interleukin-2 prolongs postactivational refractoriness 8
melanoma
cytotoxic T lymphocyte responses to melanoma cell vaccines 459
mucosal vascular addressin cell adhesion molecule-1 outside the endothelial lineage 320
microbial killing
listeria species and interleukin-4 deactivation 431
microcirculation
leucocyte recruitment in systemic lupus erythematosus-prone mice 390
microparticulate delivery
immunization using poly ε-caprolactone microparticles 185
migration
integrins and selectins in arthritis 397
mitogen activated protein kinase signalling
signalling in mutant B lymphoma lines 297
mitogen-activated protein kinase
MUC2 mRNA through mitogen-activated protein kinase pathway 275
mitogens
optimisation of an ovine antibody-secreting cell culture assay 305
monoclonal antibodies
antibody therapy for corneal transplantation 93
monocyte
integrins and selectins in arthritis 397
mouse
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
MUC2
MUC2 messenger RNA through mitogen-activated protein kinase pathway 275
Mucin 1
aspects of cancer immunotherapy 79
mucosal vascular addressin cell adhesion molecule-1
mucosal vascular addressin cell adhesion molecule-1 outside the endothelial lineage 320
multiple sclerosis
interleukin-2 prolongs postactivational refractoriness 8
myc
interleukin-2 receptor signalling 343
Mycobacterium avium
T-cell apoptosis in *Mycobacterium avium* infection 480
Mycobacterium tuberculosis
improving vaccines against tuberculosis 34

N
naive proliferation
thymic output and naive proliferation 487
natural killer cell
major histocompatibility complex class 1 up-regulation by flaviviruses 217
Neuroendocrine
circadian macrophage inhibitory factor rhythm 137
neurone
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
neutrophil
integrins and selectins in arthritis 397
niacin
tryptophan and the immune response 247
nicotinamide adenine dinucleotide
tryptophan and the immune response 247

O
oligoadenylate synthetase
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
otitis media
bacterial otitis media 46

P
pathogenesis
flavivirus evasion of the immune system 196
peptide-major histocompatibility complex interactions
aspects of cancer immunotherapy 79
peptide-based vaccines
lipopeptide-induced maturation of dendritic cells 67
peptides
determination of cytotoxic T lymphocyte epitopes 1
phagocytosis
cholesterol and intracellular trafficking 415
deficient phagocytosis in the airways in chronic obstructive pulmonary disease 289
phosphatidylinositol 3-kinase
interleukin-2 receptor signalling 343
plasma cells
plasma cells in rat yolk sac 335
PLB-985
differentiation and tumour necrosis factor-α in PLB chronic granulomatous disease cells 472
pneumococcal sepsis
FcγRIIA genotypes and streptococcus pneumoniae 192
podosome
X-linked thrombocytopenia macrophages show attenuated Wiskott-Aldrich syndrome phenotype 130
poly adenosine triphosphate-ribose polymerase
tryptophan and the immune response 247

poly ε-caprolactone
immunization using poly ε-caprolactone microparticles 185
population control
evolution of immunocontraception resistance 152
prime-boost
improving vaccines against tuberculosis 34
proliferation
IL-2 receptor signalling 343
why do B cells produce CD40 ligand? 328
protein kinases
fibroblast growth factor receptor interaction with Lck and nuclear factor of activated T cells 440
protozoan parasites
DNA-priming protein-boosting immunization 121

Q

quinolinic acid
tryptophan and the immune response 247

R

rat
plasma cells in rat yolk sac 335
reciprocal antigen presentation
reciprocal lysis of cytotoxic T-cells 266
reciprocal lysis
reciprocal lysis of cytotoxic T-cells 266
recombinant allergen
grass pollen immunotherapy vaccines 86
recombinant protein
DNA-priming protein-boosting immunization 121
recruitment
innate mechanism in xenograft rejection 451
resistance evolution
evolution of immunocontraception resistance 152
rheumatoid arthritis
drug treatment for rheumatoid arthritis and systemic lupus erythematosus 350
FcγRIIa as an inflammatory mediator 374
molecular targets in rheumatoid arthritis 354
ribonucleic acid vaccine
Kunjin replicon ribonucleic acid as a vaccine 73
ribonucleic acid virus
flavivirus evasion of the immune system 196
rolling
leucocyte recruitment in systemic lupus erythematosus-prone mice 390

S

selectins
leucocyte recruitment in systemic lupus erythematosus-prone mice 390
signal transduction
fibroblast growth factor receptor interaction with Lck and nuclear factor of activated T cells 440
signalling in mutant B lymphoma lines 297
stromal cells
in vitro development of dendritic cells 144
subunit vaccines
improving vaccines against tuberculosis 34
systemic lupus erythematosus
drug treatment for rheumatoid arthritis and systemic lupus erythematosus 350
Fcγ receptors and systemic lupus erythematosus 382
FcγRIIa as an inflammatory mediator 374
leucocyte recruitment in systemic lupus erythematosus-prone mice 390

T

T cell activation
requirements for interleukin-4 induction 283
T cell receptors
fibroblast growth factor receptor interaction with Lck and nuclear factor of activated T cells 440
interleukin-2 prolongs postactivational refractoriness 8
T cells
innate mechanism in xenograft rejection 451
integrins and selectins in arthritis 397
interleukin-2 prolongs postactivational refractoriness 8
T-cell apoptosis in *Mycobacterium avium* infection 480
T helper 1
circadian macrophage inhibitory factor rhythm 137
T helper 2 cells
interleukin-4 suppresses induction of early delayed type hypersensitivity 424
circadian macrophage inhibitory factor rhythm 137
T lymphocytes
thymic output and naive proliferation 487
Th1 response
CC chemokine receptor 1 mediating susceptibility to *Leishmania major* 114
Th2 response
CC chemokine receptor 1 mediating susceptibility to *Leishmania major* 114
thymus
thymic output and naive proliferation 487
T-lymphocytes
flavivirus decoys the immune response 207
tolerance
tryptophan and the immune response 247
transcription factors
fibroblast growth factor receptor interaction with Lck and nuclear factor of activated T cells 440
transporter associated with antigen processing
major histocompatibility complex class 1 up-regulation by flaviviruses 217
treatments
drug treatment for rheumatoid arthritis and systemic lupus erythematosus 350
tryptophan dioxygenase
tryptophan and the immune response 247
tumour immunity
cytotoxic T lymphocyte responses to melanoma cell vaccines 459
tumour immunotherapy
aspects of cancer immunotherapy 79
tumour necrosis factor
molecular targets in rheumatoid arthritis 354
tumour necrosis factor-α
differentiation and tumour necrosis factor-α in PLB chronic granulomatous disease cells 472

mucosal vascular addressin cell adhesion molecule-1
outside the endothelial lineage 320
tumour
determination of cytotoxic T lymphocyte epitopes 1
type 1 allergy
grass pollen immunotherapy vaccines 86
type 2 immunity
listeria species and interleukin-4 deactivation 431

V
vaccination
cytotoxic T lymphocyte responses to melanoma cell vaccines 459
vaccine
aspects of cancer immunotherapy 79
bacterial otitis media 46
epidermal powder immunization, hepatitis B surface antigen 52
immunization using poly ε-caprolactone microparticles 185
reducing antigen dose with cystosine guanine dinucleotide-containing oligodeoxynucleotide as adjuvant 59
vaccines
determination of cytotoxic T lymphocyte epitopes 1

W
WASp
X-linked thrombocytopenia macrophages show attenuated Wiskott-Aldrich syndrome phenotype 130
West Nile virus
flavivirus decoys the immune response 207
oligoadenylate synthetase 1b protein provides protection against West Nile virus 230
Wiskott-Aldrich syndrome
X-linked thrombocytopenia macrophages show attenuated Wiskott-Aldrich syndrome phenotype 130

X
xenotransplantation
innate mechanism in xenograft rejection 451
X-linked thrombocytopenia
X-linked thrombocytopenia macrophages show attenuated Wiskott-Aldrich syndrome phenotype 130

Y
yolk sac
plasma cells in rat yolk sac 335
